

Scout Data Transmission Overview

We understand that organizations are sensitive about what data is transmitted outside of their network. This overview is intended to inform you of when and how Docker Scout transmits data to our cloud based services so that you may make an educated decision about your usage of it.

Architecture

When does transmission happen?

Causes external transmission of data

- Examining for CVEs:

```
> docker scout cves
INFO New version 0.22.3 available (installed version is 0.20.0)
✓ SBOM of image already cached, 384 packages indexed
✗ Detected 1 vulnerable package with 3 vulnerabilities
```

```
0C 0H 3M 0L openssl 3.1.1-r1
pkg:apk/alpine/openssl@3.1.1-r1?os_name=alpine&os_version=3.18
```

```
✗ MEDIUM CVE-2023-3817
https://scout.docker.com/v/CVE-2023-3817
Affected range : <3.1.2-r0
Fixed version  : 3.1.2-r0

✗ MEDIUM CVE-2023-3446
https://scout.docker.com/v/CVE-2023-3446
Affected range : <3.1.1-r3
Fixed version  : 3.1.1-r3

✗ MEDIUM CVE-2023-2975
https://scout.docker.com/v/CVE-2023-2975
Affected range : <3.1.1-r2
Fixed version  : 3.1.1-r2
```

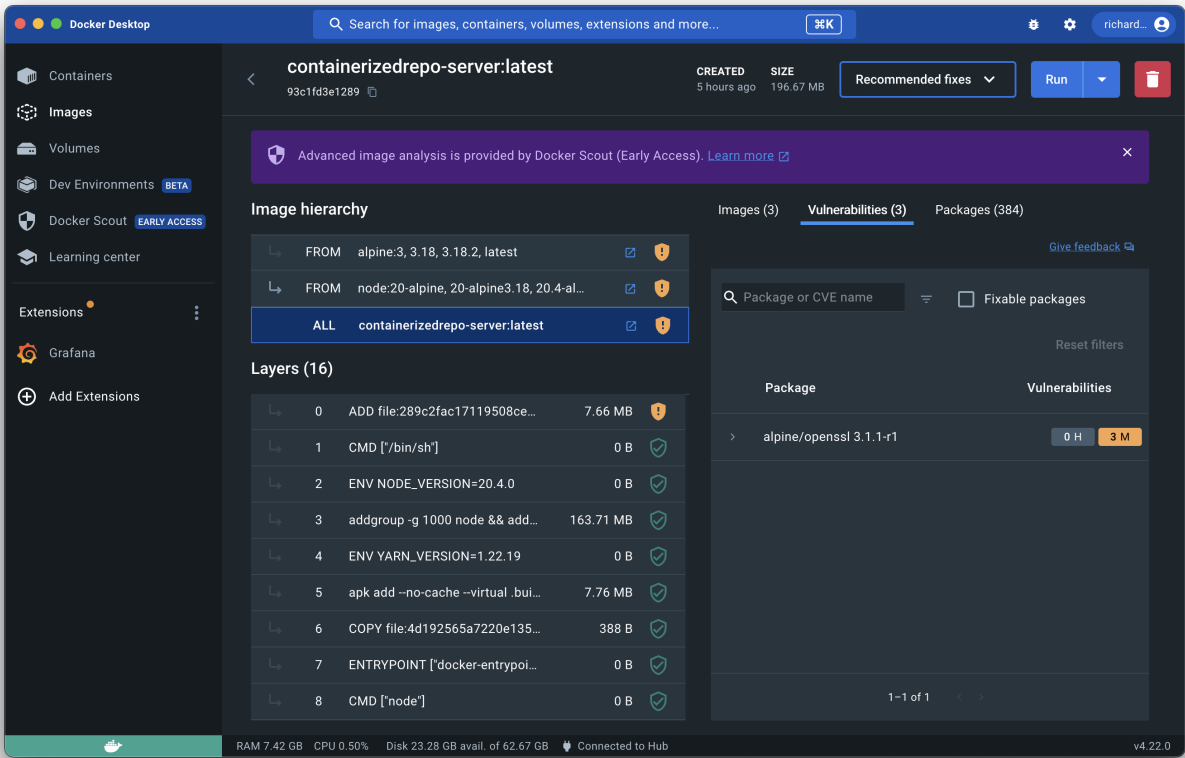

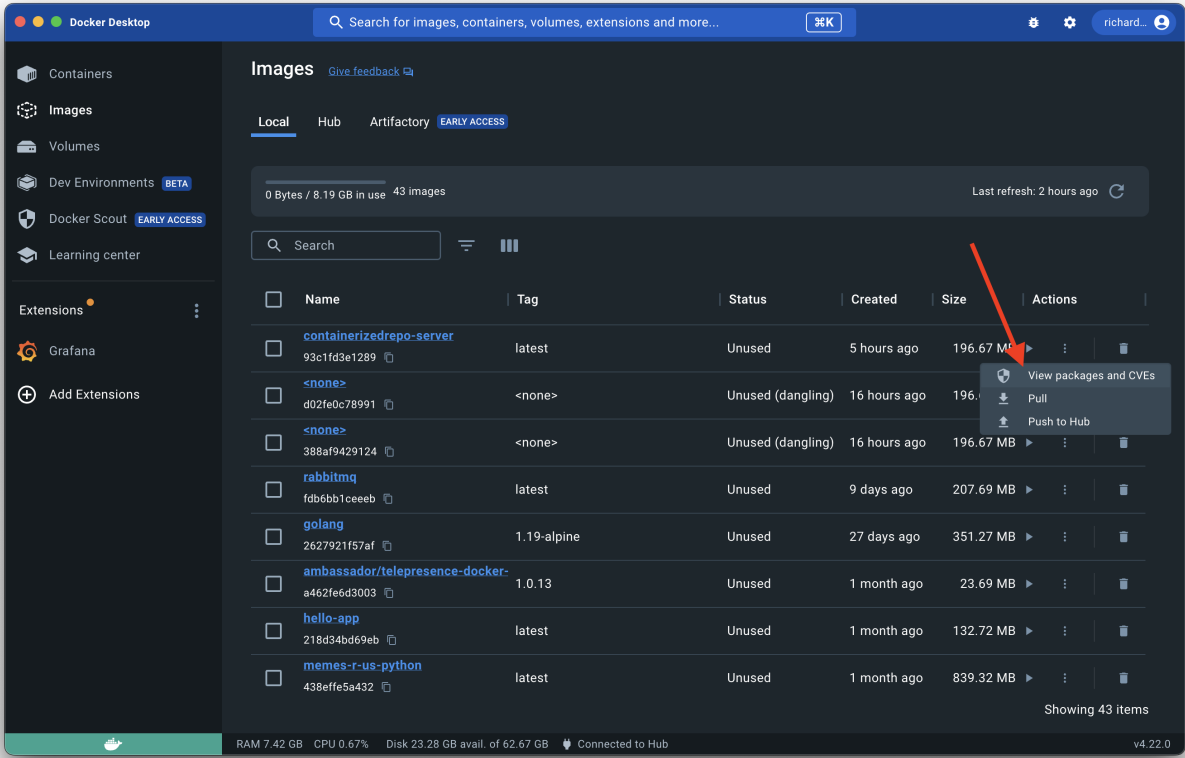

3 vulnerabilities found in 1 package

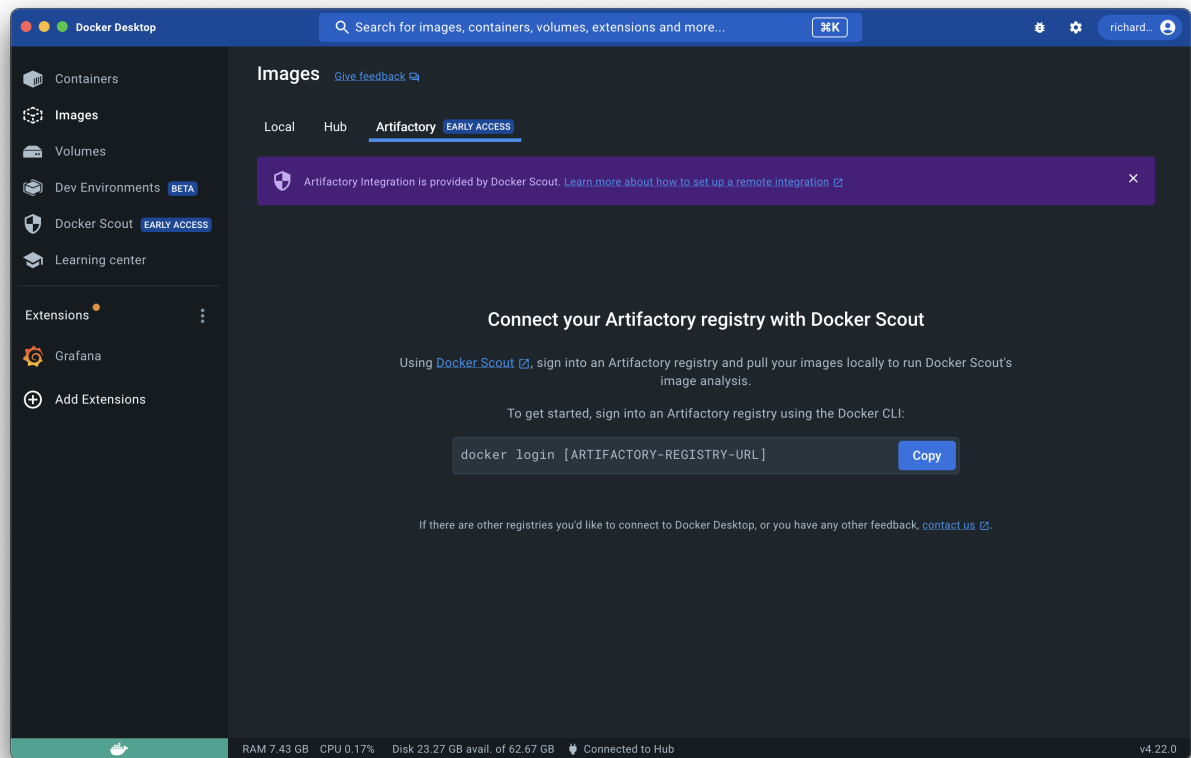

LOW	0
MEDIUM	3
HIGH	0
CRITICAL	0

What's Next?

Learn more about base image update recommendations → [docker scout recommendations](#)

```
~/code/demo/ContainerizedRepo main = !1 ?3 > █
```

Does **not** cause external transmission of data

- CLI based SBOM generation

```
> docker scout sbom
{"level":"info","msg":"SBOM of image already cached, 384 packages indexed\n","time":"2023-08-09T15:36:02-07:00"}

What Metadata do we store?

- Docker/OCI image metadata
 - Image creation timestamp
 - The digest of the image
 - Ports exposed by the image
 - Environment variable name / value
 - Name and value of image label
 - Image layer ordering
 - Hardware architecture
 - Operating system, and version
 - Registry URL, and type
-

- Software Bill of materials metadata
 - Advisory Prefix URL (PURL)
 - Package author, and description + License IDs
 - Package name, and namespace + Package scheme, and size
 - Package type, and version
 - File path within the image
 - The type of direct dependency
 - Total count of packages

The complete list of metadata stored can be found [here](#)

Where is it stored?

- [Amazon Web Services \(AWS\)](#) on servers located in US-EAST, USA
- [Google Cloud Platform \(GCP\)](#) on servers located in US-EAST, USA
